RESIN FLOORING

DESCRIPTION

Our resin flooring is available in a variety of finishes and is provided in partnership with a trusted and dedicated supplier with over 40 years of experience.

MMA (Methyl Methacrylate, Polyurethane and Epoxy solutions are available.

Our solutions focus on providing an easy to clean floor that is suitable for the required application.

TECHNICAL SPECIFICATIONS

- Methyl Methacrylate - provides a smooth and aesthetically pleasing finish for spaces that require durability and a slip resistant finish.
- Polyurethane - offers aesthetic and functional flexibility and is ideal for environments where the flooring will have consistent and substantial impacts, such as warehouses and packing areas.
- Epoxy - offers a smooth, glossy finish and provides exceptional chemical resistance, making it ideal for pharmaceutical facilities and laboratories.

CLEANING & MAINTENANCE

Resin flooring is easy to clean and maintain.

We recommend regular checks for damage, and chemical spills should be cleaned up as soon as possible.
